

Kuehnle Core Values

Educational Excellence

We believe that learning is life-long for students and teachers.

We believe in being enthusiastic and giving our best each day to support all students.

We believe all students can learn in a safe, nurturing and engaging environment despite their circumstances.

We believe in setting high expectations for our students.

Intentional Instruction

We believe all decisions should be data-driven and based on what is best for children.

We believe that students learn best when teachers establish clearly defined learning objectives and expectations, utilize research-based instructional strategies, continually assess programs and adjust strategies based on assessment.

We believe the development of critical thinking skills along with good character values are crucial to learning.

We believe that educators should be flexible and have the courage to change course when needed with a student-centered philosophy.

Collaborative Community

We believe in working collaboratively with colleagues, students, and parents; sharing ideas and respecting other's opinions to achieve our common goals.

We believe in focusing on finding solutions and achieving results together.

We believe that every student is special, unique, and capable of learning.

We believe in empowering students to recognize and celebrate greatness in themselves and their peers.

We believe in a shared responsibility for supporting the success of each student.

Be actively involved... You are Kuehnle!
